Welcome to Our Company

Established since October 11th, 2010, Reszon Diagnostics International Sdn. Bhd. (Reszon), a member of Hextar Healthcare Berhad develops and manufactures a strong portfolio of innovative **in-vitro diagnostics (IVD) rapid tests** and **enzyme-linked immunosorbent assay (ELISA) kits** for medical professionals, including clinical diagnostic markets worldwide.

Reszon's IVD rapid test kits allow medical professionals to diagnose diseases quickly and accurately for the early detection and prevention of diseases. The ease of use and portability of its rapid test kits make them ideal for applications in a wide range of settings, including remote areas and countries where sophisticated medical diagnostics are not available.

Reszon is actively transforming its manufacturing process to full automation in order to competitively address growing global needs. Reszon is also committed to providing the best affordable diagnostics in the self-testing sector.

Our Manufacturing Facilities

At present, Reszon has 2 manufacturing facilities located in USJ Subang Jaya, Selangor with 6 production lines where more than 80 employee working around the clock to develop and produce as many test kits to healthcare workers and patients.

Overseas Market

At Reszon, we continue to create solutions for healthcare institutions, laboratories, medical offices from all around the world.

The test results derived from our testing device play acute role in point-of-care decision making, influencing majority of critical healthcare decisions for millions of people worldwide.

Vision

To deliver better diagnostics solution to improve better health globally

Mission

- To be a global leading player in clinical diagnostics market
 - To produce and deliver top notch quality and cost effective diagnostic test kits
 - To constantly develop new immunodiagnostic tools with the most practical and innovative approach

CERTIFICATE

This is to certify that

Reszon Diagnostics International Sdn. Bhd.
 No.12A, Jalan TP3,
 Taman Perindustrian IEP,
 47000 Subang Jaya, Selangor, Malaysia

has implemented and maintains a **Quality Management System**.

Scope:
 Design and Production of Immunoassay and Immunochromatographic Based In Vitro Diagnostic Medical Devices

Through an audit, documented in a report, it was verified that the management system fulfills the requirements of the following standard:

ISO 13485 : 2016

Certificate registration no.	SAS2386 MP2016
Date of original certification	2018-07-13
Date of certification	2021-07-16

Our R&D and Collaboration

Our R&D team has professional expertise in various biotechnological areas with extensive experience in respective diagnostic field.

We collaborate with reputable industry leaders and scientists around the world to develop new immunodiagnostic tools in response to market demand.

Reszon also works closely with local Public Health authorities and WHO representatives in several countries in promoting disease elimination program.

Lymphatic filariasis, detection, prevention and control in Georgetown, Guyana & Pernambuco, Brazil, 2015

BRUGIA RAPID – Endorsed by WHO for use in GPELF

The **Global Program to Eliminate Lymphatic Filariasis (GPELF)** was initiated by WHO since year 2000 with the ultimate objectives to stop the spread of filariasis infection and to control morbidity through continuous collaborative effort worldwide.

Filariasis diagnostic product, **Brugia Rapid Test** manufactured by Reszon is endorsed by **WHO Technical Advisory Committee** for use during **transmission assessment survey (TAS)** in several endemic countries such as **Malaysia, Indonesia, Philippines, Vietnam and Sri Lanka.**

Through the use of our product as diagnostic tool, we hope that the correct intervention can be administered and hence helping to stop the spread of filariasis infection in affected countries.

Moving Forward

70%
AUTOMATION
by 2025

We aspire to automate 70% of our production by 2025 to stay ahead of the industry curve.

We believe this strategic investment will help us to further improve our production capacity and quality, and extending more resources to focus on next-level research & development.
