

ENVIRONMENTAL POLICY

Reszon Diagnostics International Sdn. Bhd.'s (Reszon's) environmental management strategy is centered on the use of environmentally friendly resources and reducing the carbon footprint of the Company's directly managed operations while supporting the environmental conservation and impact reduction efforts within the Company.

In line with Malaysia's goal towards Net Zero Carbon Emission by year 2050, Reszon is also committing to achieving a carbon neutral position by 2030 and a Net Zero Carbon Emissions target by 2050. We are committed to sustainable development and environmental protection, with a focus on implementing the following practices:

- a) Complying with all relevant regulatory, statutory, and legal requirements, both locally and internationally, that are related to environmental aspects;
- b) Setting environmental objectives and targets based on the evaluation of environmental aspects related to our business activities, products, and services to ensure the sustainability of natural resources;
- c) Promoting environmental awareness within the Company and among its employees and stakeholders through this Policy and other initiatives, and ensuring that the policy is available to the public;
- d) Dedicated to preventing pollution including air, water and noise pollution in all operations and continually improving our environmental management system to enhance the overall environmental performance of our daily operations;
- e) Reducing the consumption of non-renewable energy and non-recyclable materials within the operations and gradually promoting the switch to renewable energy and recyclable materials in order to reduce our carbon footprint; and
- f) Encourage the practice of reduce, reuse, and recycle (3Rs) to ease the burden on our environment and save our precious planet.

This Policy may be reviewed and amended to ensure continuous improvement and sustainability from time to time.

This Policy is available on Reszon's corporate website at www.reszonics.com.
